Networking tool

One of the main focus points of **Greencities & S-Moving** is our networking tool, that allows you to arrange B2B meetings with other participants. This networking represents a unique opportunity to find solutions , exhibit your products, services and innovations to a qualified audience and contact potential clients and partners.

Cities are a fundamental actor in **Greencities & S-Moving**, that has established itself as a meeting point for city and county councils nationwide. Every year, they come together to learn about the latest trends on the present and future of smart cities and smart, sustainable mobility.

Greencities & S-Moving will connect, once again, public administrations and key agents of the sector, creating an ecosystem of true transformation and modernizing the key axes for the management of Spanish municipalities.

Why should you participate in the networking?

- Opportunity to communicate an initiative, project or success story.
- Contact potential service providers.
- Find solutions to any specific needs your city may have.
- Meeting place with other cities.
- Space to exhibit your municipality, city and/or province's outstanding initiatives.

Available options:

- City: Standard participation
- City: Premium participation
